DWARKITES PRAISE PRAVESH VERMA MP WEST DELHI FOR RAISING ISSUE OF CIVIL DEFENCE CORPS "UNIFORM" IN PARLIAMENT

West Delhi MP Pravesh Verma raised concerns in parliament about the misuse of Khaki Vardi by civil defence corps. The questions of MP Pravesh Verma and reply by Minister Of State In The Ministry Of Home Affairs SHRI NITYANAND RAI is as follows :

(a) whether the Union Government is aware that the Government of NCT of Delhi has appointed Civil Defence Volunteers in Delhi and if so, the details thereof;

Ans.As per the inputs received from the Government of National Capital Territory of Delhi (GNCTD), the Civil Defence Volunteers have been enrolled by the GNCTD under the provisions contained in the Civil Defence Act 1968 and the Rules & Regulations framed thereunder. At present 1,34,526 Civil Defence Volunteers are enrolled in NCT of Delhi.

(b) whether Delhi Police is taking any steps to fight the menace of Civil Defence Volunteers faced by the common people of Delhi and if so, the details thereof;

Ans. The Delhi Police, being a law enforcement agency, is mandated by law to take action on violation of law by

any individual or entity, including individuals enrolled as Civil Defence Volunteers.

(c) whether there is any complaint received by Delhi Police against Civil Defence Volunteers with regard to harassment/ unlawful activity/ or of any kind; and

(d) if so, the details thereof?

Ans.(c) & (d): in box as provided

The state home minister said with re-

(c) & (d): As per the inputs provided by the Delhi Police, the details of complaints against Civil Defence Volunteers are as under:

Year	No. of complaints received	Action taken on complaints Case registered	Complaints not sustained
2019	02	02	Nil
2020	12	12	Nil
2021	28	22	06
2022* (upto 15.01.2022)	01	01	Nil

Further, with respect to the specific complaint regarding wearing uniform by Civil Defence Volunteers identical to Delhi Police personnel, the GNCTD has been asked to take necessary corrective action in this regard.

MoS Home Nityanand Rai

spect to the specific complaint regarding wearing uniform by Civil Defence Volunteers identical to Delhi Police personnel, the GNCTD has been asked to take necessary corrective action in this regard.

Since the formation of Arvind Kejriwal govt the role & the uniform of civil defence corps has been in question. During covid pandemic the civil defence corps challaned people for not wearing masks and not following social distancing or covid appropriate norms. The Delhi police had lodged FIR's against civil defence corps for issuing fake challans. The MWA's across Delhi had complained about issuing fake challans, threat by civil defence corps to CM Kejriwal during virtual meeting.

The Dwarkites applauded the efforts of West Delhi MP Pravesh Verma for raising the issue. Speaking to Dwarka Express, **Robin Sharma President Tax Payers Council of India Delhi state** said that due to blatant misuse of civil defence corps the delhi government is wasting public /tax payers money. The CM Kejriwal is wasting crores of rupees per month for his political benefit

Civil Defence measures are designed to deal with immediate emergency conditions, protect the public and restore vital services and facilities that have been destroyed or damaged by disaster.

NEELGAIS, PEACOCK, MONITOR LIZARDS, BIRDS, RABBITS ALSO HAVE RIGHT TO LIVE, DWARKITES REMINDS TO CMD NBCC & VC DDA: BHARAT VANDANA PARK-PART III

Amid the reports of death of neelgais, peacock, monitor lizards, rabbits etc and damage to waterbody at Bharat Vandana Park social activists of Dwarka have lodged a complaint against PK Gupta CMD NBCC, other competent officials and the contractor. Speaking to Dwarka Express **social activist Robin Sharma** said we are not against development but we will not allow NBCC or DDA to kill helpless animals. Robin said the NBCC & DDA had earlier committed to rehabilitate the animals at some jungle or zoo but till date no action has been taken, resulting in death of poor animals. This is clear case of criminal negligence abetting to death of animals.

Robin Sharma lodged a complaint with the PMO, Lt Governor & Chief Minister Delhi. The Delhi forest department has started the proceedings as referred by the office of CM Delhi.

The environment group Green Circle Dwarka had as far as in 2015 determined the area to be rich in biodiver-

sity, recorded several species of animals there and even assisted in rejuvenating a water body there. It had been urging the local authorities to develop the expanse as an eco-sensitive zone. However, in 2019, Delhi Development Authority redeveloped it into the Bharat Vandana Park comprising several zones, including eco-forests, for adventure and amusement and with

parking for over 1,600 four-wheelers. According to **Capt Maan, a prominent eco activist and active member of Green Circle**, in 2015 DDA had appointed professor CR Babu to inspect the Bharat Vandana Park and Mr. Babu had suggested DDA to develop the area as bio diversity park but later on in 2019 the multicore project was launched by DDA and it destroyed the

natural habitat of animals.

Selvarajan, eco warrior demanded protection for remaining Neelgai's, the antelope is Delhi state animal. Selvarajan said the Delhi forest department must take appropriate action to protect the animals and ensure a criminal case to be registered against the NBCC & DDA officials.

Shobhit Chauhan eco warrior had lodged complaint to CMD NBCC in December 2021 to protect Neelgais. Shobhit said the animal lovers tried to protect life of a neelgai which met with an accident but after some days the neelgai died, Shobhit said CMD NBCC & DDA officials must be booked under relevant section of Wild Life Protection Act for gruesome deaths of animals.

Dwarka Express with the help of Green Circle and other social activists will continue its efforts until the govt ensures rehabilitation of the neelgais & other animals to a safe zone and book officials and contractors for death of poor animals.

AAP Leader Monica Miglani Visits Shahjahanabad CGHS

Aam Admi Party Leader & representative of MLA Gulab Singh is working hard to garner support for AAP in Dwarka. The RWA's are inviting Monica Miglani to address their issues. Monica Miglani a resident of sector 6 Dwarka has worked hard in addressing the issues with DJB, BSES & now is helping CGHS for installation of boom barriers. Speaking to Dwarka Express Monica said that we are blessed to have a responsible person like Shri Gulab Singh as our area MLA. It is because of his passion to address every issue we are able to execute work in Dwarka. The Shahjahanabad CGHS RWA invited Monica Miglani. Mr. Saquib Rasool, President welcomed her and her

associates. The RWA discussed to repair the damage internal roads and swings in park for children. Monica Miglani assured to address the issues with the help of MLA Gulab Singh. The Management committee felt honour for spending time with her and also blessed her to be a successful leader said S. S Nazeer jan, Hon. Secretary. The details of office bearers of Shahjahanabad CGHS Ltd

1. Saquib Rasool, president.
2. Tasneem Akhter, vice president
3. S.S. Nazeer jan, secretary
4. Shaik Abdullah, Addl secretary
5. Dilawer Ali. Treasurer

- Continue from Page 1 ...DWARKITES PRAISE PRAVESH VERMA FOR RAISING ISSUE OF CIVIL DEFENCE CORPS "UNIFORM" IN PARLIAMENT

But it is very unfortunate to see young civil defence corps (boys/girls) serving tea, water in SDM office and other govt departments.

Pankaj Chaudhary resident of Sec-19 said MP Pravesh Verma has raised a very serious issue related to safety & security of residents of Delhi. Chaudhary said the uniform & logo of civil defence is identical to Delhi police so if civil defence corps misbehave or commit crime then we feel that Delhi police is responsible for it. The uniform & logo must be changed.

Sanjana resident of Sec-11 said "she was drinking water in market and at that time the civil defence corps cunningly took her photo as she was not wearing mask then all of a sudden 4-5 corps gathered with duty magistrate and they threatened her to challan 2000 Rs and after her refusal to pay the civil defence male corps humiliated her. But after intervention of local shopkeepers she was allowed to go to home without challan. Sanjana said looking at khaki vardi she thought civil defence corps to be police personnels. Sanjana thanked Pravesh Verma for raising such a vital issue.

Aman Sharma, Police Mitra & resident of Sec-6 said he welcomes & applauds sincere efforts of MP Pravesh

Verma as the menace of civil defence have increased exponentially during 2020-21. Aman said it seems the reason for the menace is corruption of DDMA officials.

Historically, The Civil Defence Policy of the Government of India, till the declaration of Emergency in 1962, was confined to making the States and Union Territories conscious of the need of civil protection measures and to ask them to keep ready civil protection paper plans for major cities and towns under the then Emergency Relief Organization (ERO) Scheme. The Chinese aggression in 1962 and the Indo-Pak conflict in 1965 led to a considerable re-thinking about the policy and scope of Civil Defence. The Civil Defence Act, 1968 (Act 27 of 1968) was passed by Parliament in May 1968. The Act extends to the whole of India and provides for among other things measures not amounting to actual combat, for affording protection to any person, property, place or thing in India or any part of the territory thereof against any hostile attack, whether from air, land, sea or other places, or for depriving any such attack of the whole or part of its effects, whether such measures are taken before, during, at or after the time of such attack.

Home garden: February flowers....

(V. Selvarajan, Environmentalist, Founder, Green Circle)

Come February... Preeti Sagar's eternal melody rings mildly in my ears. When I add a clue...'My heart is beating...' Hindi film Julie (1975) comes alive to oldies' mind as the spring sets in... Yes, Spring is the season...and one relates the Basant Panchami to beautiful blooms, pleasant breeze, Valentine Day and picnics to gardens. It's quite natural that a nature lover gets fascinated to the colourful blooms. Mohul gardens opens for public visit during this period. In fact, entire Delhi smiles at you with colours... gardening becomes a good passtime for elders and youngsters alike. Dwarka has many persons whose 'chehra' blossoms seeing buds in their home gardens. For Anurag Mohan of Agrasen apartment, Sec 7, gardening is a total stress reliever. He adds, 'I am excited to see butterflies hovering in my balcony'. He also makes compost from household waste for the use in his garden

Gautamentu Sarkar of Gayatri Apartment in Sector 9 says "being a person from a village background, I am always into home gardening and carve out time besides cycling and walking". He takes his visitors to his balcony proudly to show the varieties of Lilythom, Pituinia and Dahliya grown by him

Never sparing even a small vacant place, Shardamani of Astha Kunj apartment in Sector 3 has varieties of flowering plants in her corridors, balcony and some indoor plants also like snake plant and money plant. According to Sharda, placing the pot in adequate sunlight and periodical adding organic manure are the secrets of home gardens. She feels happy to nurture the plants like children.

Points to note in home gardening

1. Get some idea about the climatic conditions
2. Reach out to local nurseries to choose right plants
3. Choose suitable location at home
4. Buy some garden tools.
5. Test your soil quality
6. Get organic manure, one can make it from wet waste
7. Plan mixed varieties
8. Choose between transplantation and sowing seeds
9. Spare at least one hour daily
10. Some pest treatment is needed

Water is one of the major constraints for Dr S N Singh, who despite his health conditions, take care of the plants in and around his home in Gargil apartment for the past 12 years. He says that his garden requires compost as the land loses its quality year after year. His attachment is towards roses though he enjoys Petunia flower varieties

Captain Mann, a veteran social activist of Sadhbhawna apartment in Sector 22 says that it is difficult to keep

more plants in balcony. His love for flowering plants is not just restricted to home. Daily he walks to the nearby DDA park where he has engaged Mali to bring up awesome flowering plants like Dahlias. He is proud that the park in Sector 22 houses the most beautiful garden in Dwarka.

Talking on behalf of an RWA one of- ficebearer, who does not disclose his name laments, "some of the residents are hanging the plants in upper floors precariously, inviting danger to the lives of passers-by. Some even occupy the corridors and walkways. We are not against home gardens, but due care must be taken"

Sunflowers, Marigolds, Dahlias,

water lilies, roses are some of the flowering plants which every home prefers. Besides homes can think of indoor plants like Snake plant, Money plant, cactus varieties and crotons which do not require much light. Some are good source of oxygen and air purification. Some plants are perennial while many flowering plants are seasonal. It is interesting if the home gardens also have some vegetables and ornamental varieties. It is an art and science to have a home garden. One gets peace of mind and stress relief besides contributing to environment. If properly groomed, a home garden is a very interesting hobby

Over 12 lakh people die due to antimicrobial resistance every year; doctors blame it on antibiotics overuse

A study recently published in The Lancet provides a comprehensive assessment of the global burden of Antimicrobial resistance (AMR) which poses a major threat to human health. The researchers estimated deaths and disability-adjusted life-years (DALYs) attributable to and associated with bacterial AMR for 23 pathogens and 88 pathogen-drug combinations in 204 countries and territories in 2019. Their approach was divided into five broad components: Number of deaths where infection played a role, proportion of infectious deaths attributable to a given infectious syndrome, proportion of infectious syndrome deaths attributable to a given pathogen, the percentage of a given pathogen resistant to an antibiotic of interest, and the excess risk of death or duration of an infection associated with this resistance. Also Read - One in three elderly develop new conditions after COVID-19: US study On the basis of our predictive statistical models, there were an estimated 4.95 million deaths associated with bacterial AMR including 1.27 million deaths attributable to bacterial AMR. The six pathogens for deaths associated with resistance are: Escherichia coli, followed by Staphylococcus aureus, Klebsiella pneumoniae, Streptococcus pneumoniae, Acinetobacter baumannii, and Pseudomonas aeruginosa, the study says.

What is AMR

Dr Ramesh Chandana, chairman, safety, quality, laboratory and blood bank at the Asian Institute of Medical Sciences tells you that this condition defines a situation when the bacteria has developed resistance to the available antibiotics. "There are different kind and categories of such medicines that are there in since the time Penicillin was first coined by Alexander Fleming in 1929. Microbial means a microorganism, basically bacteria, and they develop resistance to antibiotics," Chandana told News9.

When are antibiotics needed

He tells you that the bacteria is much smaller than humans. "They have been here for millions of years. It all comes down to survival. As we developed antibiotics, the bacteria too found a way to survive and developed resistance. Yes, drug abuse or rather misuse or over use of antibiotic is the cause. Have a cold, pop a pill, tummy upset, pop a pill is a no-no. Around 60 per cent of diarrhoea are viral; the same is true for upper respiratory tract infections. Antibiotics are not needed. But people don't know this and they visit chemists and buy antibiotics for every disease. Far worse is the fact that the entire course is not taken. If the course

was for five or seven days, some people stop having antibiotics after three days because they felt better. Even doctors are prone to prescribe antibiotics because they want their patient to get well soon. Even in class I and II surgeries, only a shot of antibiotics is needed - just before the operation. It is only in class III and IV surgeries that the patient requires an entire course," Dr Chandana added.

Reasons for resistance

Dr Om Srivastava, co-director, Infectious Diseases, Sir HN Reliance Foundation Hospital in Mumbai tells you that there are several reasons for AMR in the country. "Most times, it is use of inappropriate antibiotics. A person has a common cold or a tummy upset the easiest thing he does is to have an antibiotic for the same. But was the right medicine to do the right job? What is the dosage for the same? Patients don't consider these while taking hasty decisions. These symptoms last for two-three days and when the patient becomes asymptomatic, he automatically stops the treatment without taking the entire course. This leads to resistance to the next infection. In other words, inappropriate use, inappropriate duration and inappropriate combinations are responsible for AMR that one is seeing at present," Srivastava said.

AMR prevalence

Dr Ankita Baidya, consultant, Infectious Disease, HCMCT Manipal Hospital in Dwarka, New Delhi said that about 60 per cent of the bugs detected in hospital setting shows Extended-spectrum β -lactamases resistance. "The reason for such high prevalence in the country stems due to the sale of over-the-counter medicines. Whether there is an indication of an infection or not, people end up taking antibiotics. This disturbs the system and leads to AMR. These bugs even transfer the resistance among themselves," Baidya warned.

Flip side

The biggest fallout is that you have a patient with an infection and there is no antibiotic that is going to work. "People will end up sending more time, effort and money on treating an infection that could have been treated easily with shorter duration and even oral antibiotics instead of taking them intravenously. He may end up taking more antibiotics that is needed. Instead of taking one antibiotic, he may need a combination of them," Srivastava opines.

What can be done now?

According to Dr Baidya, the solution lies not in improving the antibiotics and limiting the use but improvement in prescribing the antibiotic format. "There is an Antimicrobial stewardship pro-

gramme that promotes the appropriate use of antimicrobials (including antibiotics), improves patient outcomes, reduces microbial resistance, and decreases the spread of infections caused by multidrug-resistant organisms. The idea is to give the right antibiotic to the right person. If the programme is followed to a T, there will be marked improvement in the emergence of superbugs," Baidya said. There is also a need to regulate the antibiotics that are being used in the animal industry, Srivastava says. "We must stop the use of medicines in animals to increase their weight. A non-vegetarian can end up developing AMR due to this. We must stop prescription drug abuse. If the doctor has prescribed antibiotics for a condition, the entire course needs to be taken and not stopped mid-way," Srivastava added. He tells you that there is no specific organ that gets affected due to AMR. "It is just that every infection that requires an antibiotic will show drug resistance. The challenge then that comes up is that doctors have very few options available. Therefore, there is need to create awareness and peg responsibility to limit the irresponsibility that one is seeing now. Hopefully, with these steps, one will see good results in a short period of time," Srivastava said in conclusion.

When I reach in my school I feel this is my rebirth

I went school and I meet friends and friends. I enjoy in every class. We share our lunch box each other and with mam also. We play many games like- badminton in our playground. We dance in our dance room and we all having lots of fun. When any festival came our whole class & teachers celebrates with joy & happiness.

When I reach in my school I feel that this is my rebirth in my life. When I touch my class room I remember that this is my own class room. When we go in our playground I and my friends this was amazing moment. I feel that this is God gift. And I pray God that in future no such as circumstances will come in the world so I left the school

Anamika Bind, class 6A, Saraswati Model School

The Delhi government has allowed all schools outside Covid-19 containment zones here to reopen for classes Nursery to XII, from February 14, 2022, in view of final exams. However, it made clear that physical attendance is not compulsory and students will attend schools only with consent of parents. The decision to call students will help them to prepare for their upcoming board exams. Also, there are a number of steps that the school authorities will take to ensure that the students stay safe from the infection. The safest way for the students to commute to school would be via the private vehicles of their parents and guardians.

Seema Jain, Principal, Saraswati Model School, Dwarka

EMBRACING THE NEW NORMAL

On 31st December 2020, the world was infected by a fatal virus now popularly known as the Coronavirus. It was so widespread around the globe that even the biggest economies failed to overcome it. It took the lives of millions of people around the world. There was no hope in people for survival once infected. People disappeared from streets, markets, malls, etc. Offices and schools were shut down to get the outbreak into control. It became normal for children and adults to work and study online via group meetings.

Online schooling was a major change or some may call set-back in students' lives. They went from filling sheets to sitting in front of the screen for an immense amount of time. When the world turned online, minor human qualities

started to diminish from students. Qualities like confidence, socializing, hard work, and many more. It was like we became dependent on the internet to do things for us. Google started becoming the only hope for many to succeed in examinations. Internet was built to help us not for us to be its' slave. While this continued for the whole two years, the virus was getting variants. Vaccinations against the virus helped bring it under control.

Schools started getting reopened, but not many attended offline schools because students were still scared to attend examinations in person. But they don't understand that the reason to reopen schools is not only to conduct tests but also for the development of our growing minds. Being with people helps us to improve, being with people helps us have our opinions which helps get new ideas that lead to the development of our amateur mindset. It will be a challenge for both the school and the students to adapt to the habit they left months ago. But thenwhat is life without ups and downs? So, here we come.....with new hopes, new aspirations and above allA new confidence that All will be well !

Nikunj Sharma(Class XI) PARAMOUNT INTERNATIONAL SCHOOL

We are glad to receive the wide Smiles of our DISEdge Students

We are glad to receive the wide Smiles of our DISEdge Students on the re-opening of the Schools. " I feel immensely blessed with the trust our parents

reflect in ensuring the safety and well-being of our children' , Says Ms Anubha Srivastava, Principal, DISEdge. We reopened with fragmented days of visits for different classes. It is a cherry on the pie getting requests from parents to allow regular and daily schooling for their wards. As an educational institute, I owe my responsibilities and accountability to the society as a whole. The concerted effort of our team is primarily to meet the emotional, physical and social wellbeing needs of our children . Learning happens alongside. The little footsteps walk, run and play confidently in the safe premises of the School. It is a pride to find the youngest to senior-most, all children abiding by prescribed norms responsibly. Their conduct is an obvious loud shout out that they want no more lockdowns and they are willingly maintaining the required precautions so that the learning in physical mode stays uninterrupted.

Ms. Anubha Srivastava, (Principal DISEdge) sector 18

Online offline classes during pandemic

The "New Normal" has become the most bitter-sweet phrase since the beginning of the Global pandemic covid-19.

For the first time in many years a disease stopped the entire world from functioning normally. Every country imposed a nationwide restriction to prevent the infection from spreading the Covid-19 as it is highly contagious. Since then everything has become online from classes to offices, grocery shopping and what not! This form of life is now called the "new normal". Schools and universities are conducting classes, exams, presentations, viva etc., all are online.

The pandemic has changed the education sector, it has pushed optimisation in delivery methods. Schools and educational institutions have been forced to move online. The "new normal" has been created and it is teaching online. A lot of institutions have moved online by buying licences for video conferencing tools at cetera. In response to to significant demand, many online learning platforms offering free access to their services.

While the online world has its own set

of challenges, there are many benefits of it too. Students in online methods see faster learning than offline learning. The flexibility to go back and forth, learn at your pace, maintaining time flexibility etc. All lead to better learning for students and hence better outcomes as it can be accessed from anywhere with a device and internet connection. It is budget-friendly too. Class recordings are also available for later references.

An offline environment is such where a teacher can see students together, whereas in an online multi student class this has its own set of challenges. A teacher simply can't pay attention to 40 students at one go. Advantages of offline classes are such as students are fully attentive towards class as there is less distraction. Teachers can provide individual attention to the students, address their issues and solve them quickly.

In a nutshell, I would like to conclude it by saying offline courses are a more accepted approach to education. Since it has been in use for centuries and gives better results. Online learning helps the children to learn better technology whereas offline classes bring more power to concentrate at work which we do, be it learning, sports or acquiring any new skill.

Aditi Dabas, XI D, Shiksha Bharati Global School students.

Online classes have been a new chapter of students' life itself. It has given us more exposure to different ways of indulging ourselves in study

. Offline classes were more interactive and lively whereas online classes implied the means of magnifying the self studying skills of our student .

Now, if we arouse a comparison between the two we can mark down a few dominated points that contrast both of them. First of all the atmosphere in schools where we sit with all the students under guidance of teacher increases our concentration which is very hard to find during online classes. Student to student conversation is totally cut down. According to my opinion offline classes are still far way better than virtual classes even though assignments and management of work was better via online.

Both the online classes and offline classes are better in their own way. If we have to conclude their comparison, I would go for offline classes because in my opinion either for grabbing the concept or clearing the doubts, interactive consultation is better.

N. Aarwin, XI B

Constant break in studies will be very harmful for the students future and health

Two years ago, the whole world came to a standstill because of an unprecedented outbreak of coronavirus, a dangerous new virus that spread quickly through communities worldwide. A major impact was felt by schools all over the world which had to be closed down to stop its spread. At first, it felt like a long vacation which was enjoyable for students but as time passed by, students craved for normalcy to return. In these two years we have learned a lot. One of the biggest lessons was that although online learning has managed to keep education alive in these dire times, it cannot completely replace the traditional education system.

Now that the pandemic seems to be waning, Life is returning back to the way it was with most institutions reopening. But reopening of schools still remain a topic for debate. Some students want to return to schools while some still want to take classes in the comfort of their homes. Parents are also reluctant to send children to school because of the fear caused by this virus. They need to understand that this constant break in studies will be very harmful for the students future and health. In my opinion, schools should be reopened and the online aspect should be stopped completely, because as long as there is an option which lets people to be comfortable, they will choose it.

Both online and offline systems of education have their advantages and disadvantages. Online education has become a flexible teaching method wherein students can easily gain access to study material in the comfort of their homes. The students can easily set their own pace of learning as long as they have the right equipment and access to proper Internet connection. But as much as online education is predicted to be the future of learning, it cannot replace the holistic aspect of offline education. Offline education allows students to closely interact with the teachers and fellow students as well as participate actively in live discussions. Offline classes also provide an excellent opportunity for students to develop a strict schedule and adhere to it. It also allows teachers to monitor the responses and behaviour of the students and accordingly address them as and when required individually.

During online classes, quite a few students pay no attention to what is being taught and do what they want with their cameras off and microphones muted but the student teacher interaction is very important. On the other hand, offline classes allows students to immediately address the doubts and receive quick feedback. It also allows for activities, debates and discussions which helps students build up their confidence and social skills. Another major flaw of online is the lack of physical activities which has a huge negative impact on the physical and mental health of the student. Constantly sitting in front of a screen for such long periods of time can be very harmful for students' eyesight and even causes frequent headaches. All these setbacks can be easily and efficiently tackled by offline classes. And now that the vaccine is available for 15 to 18 year old children, there is another reason For schools to reopen and function properly.

Waiting to embrace the new normal !!!!

Aryaman Mohan (Class : XI), Paramount International School

More overwhelming than ever before

My experience was good after reopening the school this Feb, the start of the school year seemed more overwhelming than ever before. One could observe the mixed feelings of excitement, joy, and confusion among the students and parents. After the many weeks of distance learning, which was challenging for children, parents, and teachers alike, the willingness to go back to normal learning processes is now demonstrably high. I was on cloud nine after meeting my class teachers also understand them better than before. Everyone displays a readiness to comply with the new safety regulations set by the government. I met my classmates after a very long time. All the standard safety procedures are observed as children enter the school building.

Ridhima (Class- IX -A)

It was a very awesome experience

It was a very awesome experience to join assembly after 2 years. V.P. mam motivated us and we were very happy to meet our friends and teachers after so long. Even the toddler class had joined the assembly. We had prayer song, thought, wellness activity and motivational speech by our VP ma'am. The assembly ended after the national song.

Lavanya, Class – 7, Section –D, Bal Bhavan International School

It was an amazing experience to meet our friends and teachers after so long. As soon as I entered the school building I had the refreshing vibes. We had morning assembly. Toddlers also assembled and we had a happiness song which filled the air with lots of cheerfulness. Assembly started with prayer song, thought, pledge and the assembly ended after National Anthem.

FOOTPATH DAMAGE NEAR BAHAWALPUR CGHS SECTOR 4, DWARKA

The Delhi Development Authority needs to repair or relay all the drains as almost in every sector the drains are caving in or are broken. The latest site is in front of Bahawalpur CGHS Sec-4. The DDA officials tried to do cosmetic surgery by laying RCC covers but it is of no use as those covers are missing. For the safety of pedestrians the DDA must immediately place RCC cover on drain and repair the damaged footpath, demanded Ajit Swami President All Dwarka Residents Federation.
